Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 and 12, drawn to a beverage cartridge, classified in class 99, subclass 295.
- II. Claims 10, 11 and 13, drawn to a method of dispensing a beverage, classified in class 426, subclass 433.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used in a materially different process of using that product, such as one which does not require dispensing into a receptacle.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

During a telephone conversation with Joseph Shipley on February 8, 2006 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-9 and 12. Affirmation of this election must be made by applicant in replying to

Art Unit: 1761

this Office action. Claims 10, 11 and 13 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Fond '702.

There is disclosed in Fond a cartridge 1 containing one or more beverage ingredients 5 and being formed from air and water impermeable materials, the cartridge comprising a storage chamber, wherein the aspect ratio of the vertical height of the storage chamber to the breadth of the chamber is between 0.10 and 0.43 (see col. 2, lines 45-50).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1761

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fond '702 in view of EP 0638486.

There is disclosed in the European reference the use of plural inlets directed radially into a storage chamber of a cartridge, and a filter disposed between the storage chamber and an undersurface of a top of the cartridge.

It would have been obvious to one skilled in the art to provide the cartridge of Fond with the plural inlets and filter arrangement taught in the European reference, in order to provide for a better dispersal of water to the ingredients.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Brown and Lazaris et al. are cited for their disclosure of applicant's claimed cartridge aspect ratio.
